

Toploader OS Guide

About, Updates and Support Guide

Find version information, update checks, release links, legal notices, community support and Pro status.

Use this when checking maintenance or support options.

Applies to Toploader OS v1.4.7. Use this guide as workflow support, not as financial, legal, tax or marketplace policy advice.

What this guide covers

1. Version and updates
2. Legal documents
3. Community and support
4. Pro status
5. Independent tool disclaimer
6. Final checklist

Version and updates

The app stores its current version and can check the public GitHub releases feed for a newer build. The About page offers update check, download and release-page actions when a release is available.

Legal documents

The About page can show bundled legal documents including the EULA, privacy notice and third-party notices. Users must accept the current EULA version on first run before using the app.

Community and support

The About page includes community/support links such as Discord. Use these for questions, bug reports, feedback and release updates.

Pro status

The About page mirrors Pro activation state, provides an upgrade button when Pro is not active and provides a licence check action.

Independent tool disclaimer

Toploader OS is an independent seller tool and is not produced by, endorsed by or affiliated with Wizards of the Coast, Scryfall, Whatnot, eBay, Cardmarket, GitHub or Lemon Squeezy.

Final checklist

- App version is known.
- Update checks work.
- Legal documents are bundled in the release.
- Support links are accessible.
- Pro status displays correctly.

Keep this guide near the app while you build muscle memory. The best workflow is usually inventory first, show or export second, reconciliation third, analytics last.

Disclaimer

Toploader OS is an independent seller workflow tool. Marketplace fees, CSV templates, platform rules and third-party data can change. Always preview exports before uploading and use your own judgement before pricing or listing stock.
